

Lecture 01

INTRODUCTION TO ITP

IT2080 IT Project

B. Sc. Special Honors in Information Technology

Year 2 – Semester 2

Agenda

1. Introduction to ITP
2. Project Initiation
3. Guidelines to Succeed the Project
4. Sample Case Studies

1. Introduction to ITP

- **Course Code:** IT2080
- **Course Name:** Information Technology Project (ITP)
- **Credit Points:** 4
- **Duration:** One Semester
- **Enrollment Key :** it2080

ITP – Academic staff

Dr. Samantha Rajapaksha
Senior Lecturer(HG)
Head | Department of IT

Mrs Geethanjali Wimalaratne
Senior Lecturer
Lecturer in charge –ITP
Department of IT

Mr SMB Harshanath
Lecturer
Department of IT

Ms Aruni Premarathne
Assistant Lecturer
Department of IT

Ms Sasini Hathurusinghe
Assistant Lecturer
Department of IT

Ms Akshi De Silva
Assistant Lecturer
Department of IT

Ms Kaushika Kahatapitiya
Assistant Lecturer
Department of IT

Staff : Other Campuses

Ms Bhagyani Chaturika
Senior Lecturer
Matara Center
bhagyanie.c@sliit.lk

Ms Menaka Moonamaldeniya
KANDY UNI
Assistant Lecturer
menaka.m@kandyuni.lk

Mr. V.A.M.R. Sinthujan
Lecturer
SLIIT NORTHERN UNI
sinthujan.r@sliit.lk

1. Introduction to ITP

Pre-requisites

- Knowledge acquired through one and half years of completing the Associate Diploma Course in Information Technology

1. Introduction to ITP

Mode of Delivery

Formal

- 2 hr Lecture session, 1 hr Tutorial, 2 hr Evaluation/Lab session per week. They are used for
 - Discussions with the lecturer/ Supervisor
 - Activities
 - Presentations
 - Demonstrations
 - Viva

1. Introduction to ITP

Mode of Delivery

- Lectures are activity based.
- Participation for lectures is compulsory
- Marks are allocated for activity participation.

Evaluation (2 hours)

- Evaluation sessions/Labs will be conducted for project evaluations, group activities and discussions.
- Students are encouraged to make use of the time for group meetings, client/supervisor meetings, preparation of documents and project development

1. Introduction to ITP

Mode of Delivery –Informal/formal

- Group discussions among the group members (e.g. standup meetings, sprint planning)
- Members participating in project planning and development
- Meeting the client (by appointment)
- Progress related discussions with Lecturer/staff member

1. Introduction to ITP Self-Study

- You should self-study following and use them in your project.
 - A project management tool
 - Version Control System (VCS) - Git/GitHub
 - Technology stack to develop the product

1. Introduction to ITP Resources

- **Resources and Materials**
 - Unit resources and material will be available in courseweb.
 - Refer extra resources to gain knowledge and skills
 - Attend workshops and sessions organized by SLIIT
- **Notices**
 - All common notices will be published on the courseweb unit page
 - Check the unit page regularly

1. Introduction to ITP

Objectives of ITP

What is ITP?

- This unit involves students in developing and managing an ICT project based on a requirement
- Involves identifying the project goals, defining objectives, designing, project planning and implementing the project, by showing various stages of completion.
- Opportunity to familiarize with relevant tools to design and develop
- Vital part of your academic curriculum that supports your academic as well as professional development.
- Preparation of project documents at different stages of completion
- Presenting the progress of product development

Objectives of ITP

- **Address Real-World Challenges**
 - Identify and tackle real-world problems that need IT solutions
- **Build Essential Skills**
 - Problem solving
 - Client interaction and project management skills.
 - Enhance teamwork and collaboration capabilities.
- **Demonstrate Expertise**
 - Showcase your ICT knowledge and practical skills.
 - Benchmark your ability to solve industry-relevant issues

Objectives of ITP

- **Stand out as a Graduate**
 - Establish a strong foundation for career success.
 - Enhance employability with proven skills and experience.
- **Gain experience with Tools and Processes**
 - Use industry-relevant tools such as version control systems, project management software, and integrated development environments (IDEs).
 - Apply agile, waterfall, or hybrid methodologies in project development.
 - Develop technical documentation to meet professional standards
- **Enhance Graduate Employability**

1. Introduction to ITP

Semester plan

Refer to the
2025 S2 IT2080 ITP - Delivery Schedule
in courseweb

1. Introduction to ITP Assessments

- Assignment 1: Project Proposal [20%]
 - Project Proposal (document) [10%]
 - Presentation + Q&A [10%]
- Assignment 2: Progress [35%]
 - Activities [15%]
 - 80% completed prototype demonstration
Viva & code evaluation[20%]
- Assignment 3: Final product [45%]
 - Report, Poster [15%]
 - Product demonstration + viva [30%]

1. Introduction to ITP Evaluation

- As specified in the assignments
 - Read and follow the instructions
 - Refer the marking schemes (Assignments 1-3)
 - 80% of the product(integrated) by 8th week
 - Final product should be integrated and tested, by 12/13th week

1. Introduction to ITP Evaluation

- In every assessment the contribution of each member is assessed
 - **A “common mark” is not given for the entire project**
- To pass the module, every member’s involvement in all project stages is necessary
 - Need to use version control
 - Demonstrate the progress through activities, presentations, demonstrations and documents

1. Introduction to ITP Evaluation

- During evaluations, all members must be present
- Absent members will **not get** marks for the evaluations
- Instructions given in the assignments needs to be read carefully by all members
- Evaluations will be held **during the lecture, tutorial or lab sessions** (schedule will be published)
- All the members of the group must attend the same lecture and the tutorial session
- Presentations should be done **only** in English medium

1. Introduction to ITP Document Submissions

- Project Proposal Document – during proposal presentation
- Progress Document/s - During progress Presentation
- Group activity documents – at the end of the session
- Final Report – at the end of the final presentation.
- **Group documents can be submitted by one member of the team to the link.**
 - The document name should contain the correct groupID
 - Read assignments for more details

2. Project Initiation

2. Project Initiation

Categories of Projects

□ Industry Based Projects

- Collaborate with a real client to address specific business challenges.
 - Developing a custom inventory management system for a local retailer.
 - Building a customer relationship management (CRM) tool for a startup.

□ Innovative web-based applications

□ Projects aligned to competitions

- Example : Microsoft Imagine Cup

2. Project Initiation

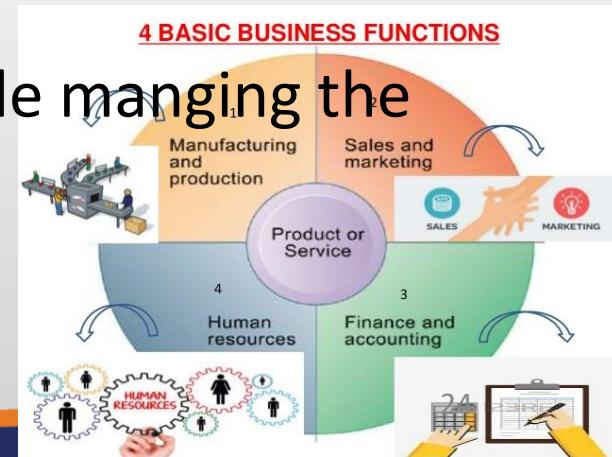

Type of Project

- Web-based Application
 - Not a Website
 - May use browser-based apps and/or mobile apps at client's end
- Desktop Application – Not recommended

2. Project Initiation

Project Scope

- Clearly understand the requirements of the project
- The scope must not be too small or too large for a 12 week duration.
- The project must have 5 significant business functions
- Investigate the solutions that are currently available (literature review)
- Design and develop the project while managing the team

Scope for Individual Member

- Every member should be aware of business process
- All the members should have a good overall understanding about the entire project in depth and the functions assigned.
- Develop meaningful functionalities (user stories) by every individual
- A working product is essential (integrated)
- Each member should be responsible to generate at least one meaningful report for the respective function.
- Other than individual function development, all the members should involve in document preparation.

Contribution by the Team Members

❑ Handle your function from “end-to-end”.

- All members are responsible for documenting, designing, coding, testing
- Maintain a repository, Handle version control (use GitHub)
- All members are responsible for contributing to the team throughout

2. Project Initiation

Project Ideas:

Smart Inventory Management System for a small business

- Web-based inventory system with stock tracking, low-stock alerts, and barcode scanning.

Appointment Scheduling System for Clinics or Salons

- Users can book appointments, receive reminders, and manage rescheduling through a portal.

Event Management & RSVP System

- Platform to send invites, manage RSVPs, plan seating, and track budget.

E-Ticketing & Queue Management System

- System to generate tokens, monitor queues, and alert users when it's their turn.

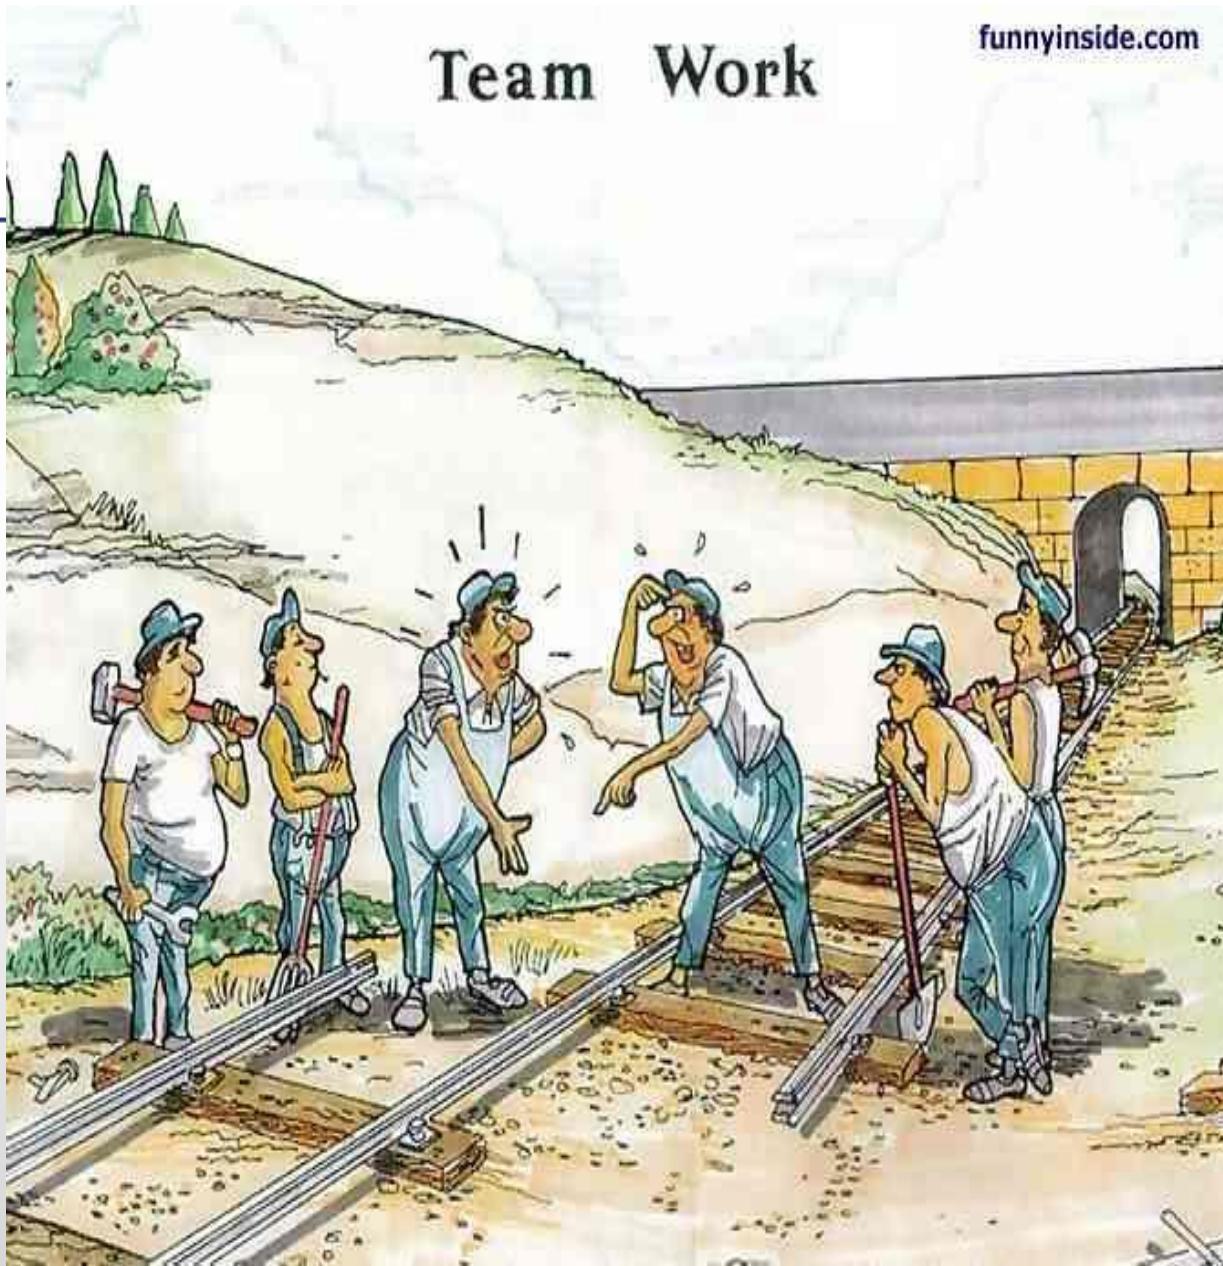

3. Guidelines to Succeed the Project

Common issues of project groups

- Lack of understanding of the business' needs
- Not clearly aligned on top priorities for the project.
 - Decomposing these priorities into “must-haves,” “should-haves” and “could-haves”
- Students begin programming before they understand the problem
- Not working continuously in the project and not given effort to the quality of outcome
- Lack of teamwork and communication

Team Work

funnyinside.com

Points to note:

- Identify the important requirements
- Follow a suitable software development methodology
- Introduce software quality from the very beginning of the project
- Use good engineering practices (coding standards, CICD)
- Use appropriate tools - estimation, reviews, requirements specification, designing, testing etc.
- Work as a team and ensure that you monitor your progress

Academic Integrity Policy

- Are you aware that following are **not accepted** in SLIIT.
 - **Plagiarism** - using work and ideas of other individuals intentionally or unintentionally
 - **Collusion** - preparing individual assignments together and submitting similar work for assessment.
 - **Cheating** - obtaining or giving assistance during the course of an examination or assessment without approval
 - **Falsification** – providing fabricated information or making use of such materials
- Committing above offenses come with serious consequences
- See General support section of Courseweb for full information.

Use of Generative AI tools

The use of generative AI tools is permitted in this course only for the following activities:

- Brainstorming and refining your ideas;
- Finding information on your topic;
- Drafting an outline to organize your thoughts
- Checking grammar and style.

Use of Generative AI tools

The use of generative AI tools is **not permitted** in this course for the following activities:

- Impersonating you in classroom contexts, such as by using the tool to compose work assigned to you or content that you are responsible for.
- Completing group work that your group has assigned to you, unless it is mutually agreed upon that you may utilize the tool.
- Writing a draft of a writing assignment/activity/presentation.
- Writing entire sentences, paragraphs or papers to complete assessments.

Use of Generative AI tools

- You are responsible for the information you submit based on an AI query (for instance, that it does not violate intellectual property laws, or contain misinformation or unethical content).
- Your use of AI tools must be properly documented and cited
 - Provide a description of the AI tool used, how the information was generated, including the prompts you used, and the date accessed. You could add this acknowledgement as a footnote or at the end of your reference list, but you should check with the lecturer for guidance.
 - e.g.
I acknowledge the use of Copilot [<https://copilot.cloud.microsoft/>] to generate ideas and material for background research in the drafting of this assignment. The following prompts were entered into Copilot on 1 Dec 2024: "Explain whether
"Please reference your answer".

Exercise 1

Activity 1(in class)

5. Sample Case Studies

5. Sample Case studies

School Management system

- Client: Education Institute/School in your area
- Goal : To automate the school manual work

- Identify the main functions of the school
- Identify the people who are involved with the system and why they use the system

5. Sample Case studies

School Management system

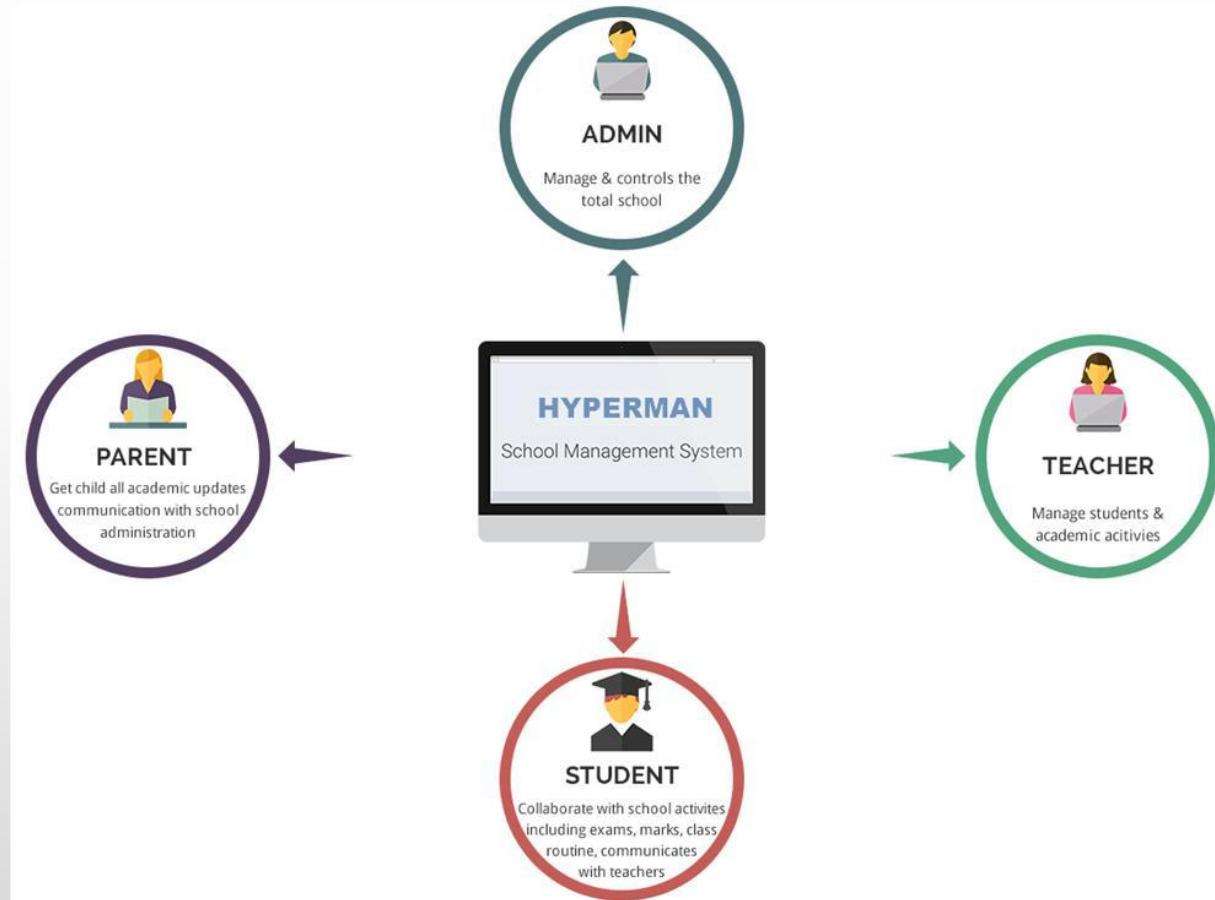

School functions can be categorized according to the client requirements

5. Sample Case studies

School Management system

Identify who will going to use the system and what are the benefits from the system.

5. Sample Case studies

School Management system

Sample Home page

The screenshot shows the 'ADMIN - HOME' interface of the 'EDUCATION PLUS - SCHOOL MANAGEMENT SYSTEM'. The top navigation bar displays the system's name. Below it, the 'education+' logo is prominently displayed next to a stylized profile of a person's head with gears, symbolizing education and management. A small illustration of a person working on a laptop is visible in the top right corner. The main area is titled 'ADMIN - HOME' and contains a grid of 15 icons, each representing a different management function:

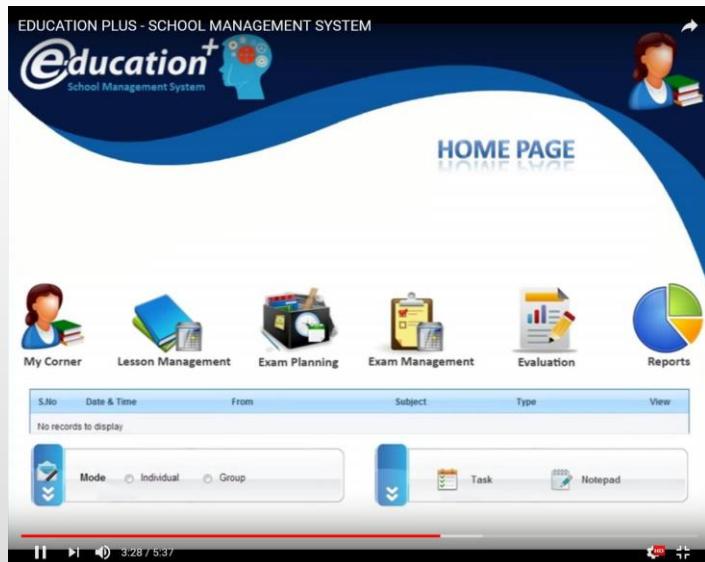

- Master Setup
- School Staff
- Student
- Time Table
- Attendance
- Lesson Management
- Exam Planning
- Exam Management
- Evaluation
- Fees
- Finance
- Roll Over
- Login Info
- Reports
- Message Alert

At the bottom of the screen, there is a navigation bar with icons for back, forward, and search, along with a timestamp '2:07 / 5:37' and a video control indicator '42 HD'.

5. Sample Case studies

School Management system

Different user roles may have different home pages

The image displays two side-by-side screenshots of the 'EDUCATION PLUS - SCHOOL MANAGEMENT SYSTEM' interface, illustrating how it adapts for different user roles:

- Left Screenshot (Student View):** Shows a 'HOME PAGE' with icons for 'Student Corner', 'Reports', 'Fees', and 'Mail Request'. Below these are sections for 'S.No', 'Date & Time', 'From', 'Subject', 'Type', and 'View'. A table shows no records displayed. A mode selection dropdown is set to 'Select Subject Teacher'. At the bottom, there are buttons for 'Task' and 'Notepad'.
- Right Screenshot (Parent View):** Shows a 'HOME PAGE' with icons for 'Calender', 'Time Table', 'Attendance', 'Homework and Assignment', and 'Reports'. Below these are sections for 'S.No', 'Date & Time', 'From', 'Subject', 'Type', and 'View'. A table shows no records displayed. A mode selection dropdown is set to 'Select Subject Teacher'. At the bottom, there are buttons for 'Task' and 'Notepad'.

5. Sample Case studies

School Management system

The screenshot displays the homepage of the Attendance Portal. At the top, there is a logo featuring a stylized orange person icon holding a pencil, followed by the text "Attendance Portal" in green and yellow. Below the logo is a navigation bar with links: Home, Standard, Staff, FeedBack, Admin Panel, and Contact Us. The main content area is divided into two sections: "Student Login" on the left and "Staff Login" on the right. Both sections contain input fields for "Login Name" and "Password" and a "Login" button. To the right of these login boxes is a large, central image of a classroom. A male teacher in a blue shirt is standing at the front, pointing towards a whiteboard where a drawing of a house is visible. Several students are seated at their desks, facing the teacher and raising their hands. Below this image is a decorative row of cartoon children sitting at desks. At the bottom of the page, the slogan "Attend Today, Achieve Tomorrow" is displayed in blue text.

5. User roles

The image displays four screenshots of the Hospital Management System interface, illustrating different user roles:

- Hospital Management System - Admin Section:** Shows icons for Pathology, X-Ray, Ultra Sound, ECG, and Other Test.
- Hospital Management System - Certificates Section:** Shows icons for Birth Certificate, Medical Certificate, and Death Certificate.
- Hospital Management System - Medicine Department:** Shows icons for Vendor Entry, Medicine Entry, Invoice, Medicine Sale, and Medicine Return.
- Hospital Management System - User Section:** Shows icons for Add Agent, OPD (with sub-options for OPD and IPD), Check-Up, Medicine, Certificates, Doctor Panel, Other Patient, Accounting, Employee, and Reports.

5. Sample Case studies

Hospital Management System

The image displays a composite view. On the left, a close-up photograph shows a medical professional's hand holding a black stethoscope against a light blue background. On the right, a screenshot of a "HOSPITAL MANAGEMENT SYSTEM" software interface is shown. The interface has a dark blue header with various menu options: IPD List, Investigations, Investigations Payment, Other IPD, Ward Details, PayStatus, Payment, and Discharge Card. Below the header, a sidebar lists ward types: General Ward, Private Ward (which is selected and highlighted in red), ICU Ward, ICCU Ward, semi private, and delux. The main area is titled "Ward Status" and shows a grid of 10 beds arranged in two rows of five. Each bed icon contains a small figure of a patient. Above the grid, a dropdown menu says "Select Room Room 1st" and "Total No of Bed 9". A large blue circular arrow graphic is overlaid on the bottom right of the interface.

5. Sample Case studies

Hospital Management System

The image shows a screenshot of a Hospital Management System software interface. The title bar reads "HOSPITAL MANAGEMENT SYSTEM". Below it, there are three navigation links: "Dr Registration", "Attendance", and "Attending Patient". On the left, there is a form titled "Dr Registration" with fields for "Dr. Name", "Dr. Qualification", "Specialist", "Timing", "Mobile No.", "Pan No.", "OPD Fee", "IPD Fee", and "Procedural Fee". A date field shows "Date 17/01/2017" and two buttons: "Submit" and "Cancel". On the right, there is a "Dr. List" table with columns: Dr. Id, Dr. Name, Specialist, Timing, and Mobile No. The table contains six entries. At the top of the "Dr. List" section are search fields for "Dr. Id" and "Dr. Name", and buttons for "Search" and "All". A blue circular arrow graphic is overlaid on the interface, centered around the "Dr. List" table.

Dr. Id	Dr. Name	Specialist	Timing	Mobile No
1	Ram Krishna	Medicine	10:30 AM to 4:30 PM	9451052579
2	Maneesh	Medicine	10:30 AM to 12:30 PM	9451052579
3	Vineet Kishor	Medicine	10:30 AM to 12:30 PM	9451052579
6	Dr. Vineet Kishore	Urologist, MCH	2:30 PM to 4:30 PM	8737970126
